PAGE

Phosphate in aluminum systems, Reactions of:
I. Adsorption of phosphate by X-ray amorphous "aluminum hydroxide" 197
II. Precipitation of phosphate by exchangeable aluminum on a cation exchange resin 210
Phosphorus in Alberta soils, Comparison of an acid and an alkaline extracting solution for measuring available 115
Phosphorus content of a clay soil and on crop yields and quality in a long-term crop rotation, Effects of mineral fertilizers and manures on the 137
Phosphorus uptake by alfalfa as influenced by phosphate source and moisture 254
Phosphorus nutrition in two Nebraskan wet meadow soils 289
Potassium in some Canadian soils, Fixation of 96

Saline-sodic soil with shallow tile drainage, Reclamation of a 43
Sampler for taking soil cores for the greenhouse and laboratory, A 224
Soil moisture stress on yield, water-use efficiency and mineral composition of oats and alfalfa grown at two fertility levels, Effect of 7
Soil as affected by previous cultural treatment, Field capacity of a 13
Soil particles in saltation, Movement of 81
Soil drainage following an irrigation, Rate of:
III. A new concept of the upper limit of available moisture 122
IV. Effects of consumptive use and soil depth on upper limit of available moisture 129
Soil moisture sampling, Variability in 157
Soil moisture tensions on growth of wheat, Effects of 180
Soil cores for the greenhouse and laboratory, A sampler for 224
Soil water level, An instrument for measuring 226
Solonetz soil, Some effects of deep working on 273
Solonetzic soil complex, Some moisture relations in a 17
Sphagnum peat soil, Molybdenum deficiency in 222
Sphagnum peat soil, Boron deficiency and toxicity in crops grown on 302
Sr 90 content of oats grown in selected Canadian soils, The influence of soil properties and soil amendments in the 23
Sulphur in soil, Carbon-bonded 223

Water retention and swelling pressure of clay soils 189
